Notice of Allowability	10/795,980		LYNNWORTH ET AL.	
	Examiner	Art Unit		
	Corey D. Mack	2855		
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.				
1. This communication is responsive to <u>application filed 10 March 2004</u> .				
2. The allowed claim(s) is/are <u>1-30</u> .				
3. The drawings filed on 10 March 2004 are accepted by the Examiner.				
 4.				
Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).				
7. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Application/Control Number: 10/795,980

Art Unit: 2855

DETAILED ACTION

Allowable Subject Matter

Claims 1-30 are allowed. The following is an examiner's statement of reasons for allowance: The prior art or record, alone or in combination, fails to teach or fairly suggest an apparatus or method for determining mass flow rate of a fluid in a flow passage having a predetermined area, comprising:

An exciter for propagating an ultrasonic wave along said waveguide including along a waveguide exposed to the fluid flow and having a propagation density dependent upon the density of the fluid adjacent the sensor; first means coupled to the waveguide for detecting the propagated wave and providing a first signal proportional to the transit time of the propagated wave along the density-responsive section of the waveguide for determining the density of the fluid; second means forming part of the sensor for detecting the shedding frequency of the vortices shed fro the vortex shedding means and providing a second output signal proportional thereto for determining the velocity of the fluid; and, a processor for generating an indication of the mass flow rate of the fluid through the passage based on the density and velocity of the fluid and the predetermined area of the flow passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2855

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corey D. Mack whose telephone number is (571) 272-2181. The examiner can normally be reached on M-F, 8:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571) 272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
